

# ENVIROPREP MEDIA BLASTING

## CAPABILITY STATEMENT

Enviroprep Media Blasting provides a mobile abrasive blasting solution to Industrial, Commercial and Residential sectors throughout South-East Queensland.

## COMPANY PROFILE

Enviroprep Media Blasting is a surface preparation wet abrasive blasting company operating out of the Sunshine Coast. We offer a variety of industrial, commercial and residential blasting applications.

As we are a completely self-sufficient and mobile company we can also offer a flexibility that traditional sandblasters cannot. Our mobility allows us to come to you, saving time and money on transportation as well as blasting those immovable projects.

Our scope of services is varied and our knowledge of the industry means we can tailor every blasting process to suit individual requirements.

## WHAT WE DO BEST

Our capabilities extend across many industries

*Line marking removal from concrete floor carpark*

- ✓ Rust removal from steel
- ✓ Steel footing remediation
- ✓ New metal fabrication etching
- ✓ Metal degreasing
- ✓ Paint removal from all metal types
- ✓ Heavy machinery blasting
- ✓ Pool restoration
- ✓ Antifoul removal
- ✓ Antique restoration
- ✓ Building restoration
- ✓ Metal weld stress test blasting
- ✓ Exposing aggregate
- ✓ Exposing Pebble Crete
- ✓ Line marking removal
- ✓ Paint removal
- ✓ Concrete cleaning
- ✓ Waterproofing preparation
- ✓ Graffiti removal
- ✓ Stencil etching on concrete
- ✓ Brick/Block restoration
- ✓ Fire damage restoration

## Customer feedback...

“Totally brilliant service, more than professional. Everything done to perfection. Highly recommend”

Melissa Armitage – Facebook review June 2016

# WHY WE DO IT

## OUR VISION

Enviroprep Media Blasting is committed to offering our clients a streamlined process from the initial quote to the final invoice, with regular updates and communication along the way.

We aim to be reliable, professional and deliver on price and quality.

*Removing graffiti from brick wall*

## OUR VALUES

We have strong customer values and pride ourselves on our reputation

### Quality

We pride ourselves on delivering quality solutions to the exacting specifications of our clients. Quality is the key component of everything we do.

### Reliability

We strive to uphold the highest level of communication and deliver beyond expectation. We realise the importance to deliver on our promises on time and strive to do so every time.

### Client Focused

We listen. We understand. We follow through. We have a reputation and are driven by results to deliver a quality services to every single one of our clients.

### Flexibility

We pride ourselves on being adaptable and on understanding the dynamic nature of the industries we service.

## KEY BENEFITS

Dustless blasting offers different options to clients

*Stripping paint and rust back from a classic car*

Dustless blasting carries some key benefits over traditional sandblasting methods. Because the media utilised in dustless blasting is wet, it hits the material a lot harder and strips it much more efficiently. Our blaster allows us to increase or decrease the amount of water, media and air, giving us greater control and precision.

Dustless blasting:

- ✓ Creates minimal dust
- ✓ It is the cleanest method of blasting that exists
- ✓ Reduces the amount of abrasive material needed to get the job done
- ✓ Works faster than traditional sandblasting
- ✓ Doesn't warp thin material due to reduced friction
- ✓ Requires less containment
- ✓ Costs can be less than replacing the item
- ✓ Leave any surface decontaminated and ready for painting

A corrosion inhibitor is used to prevent flash rusting for up to 72hrs following the blasting session on metal objects. For easy clean up, the operator can lay down plastic in the affected area ahead of time so that the abrasive media can be easily collected for a fast clean up. Because there are no plumes of dust, the media is entirely localised and is easily cleaned away after the job is done. We are proud to employ the best blasting methods to serve our customers.

## OUR CAPABILITIES

*Blasting paint and rust from tower cranes for stress testing compliance*

Our unique solution gives us greater control

Our mobile wet abrasive blasting service offers a unique solution for a wide range of surface preparation projects that you may have.

Wet blasting, also known as vapor blasting or dustless blasting can be used for a wide range of tasks. Some of these tasks may make it impossible for you to transport the project to a sandblaster. This is where our self-sufficient mobile service vehicle can help you. At some stage you may require onsite metal remediation work, concrete etching or paint removal from various substrates. You may even need paint removal from a car, truck or trailer.

Some of our previous work has included:

- ✓ Rust removal from large agricultural farm sheds
- ✓ Rust removal from steel residential house footings
- ✓ Rust removal from sky tower cranes for weld stress testing
- ✓ Road line removal from warehouses at the end of a lease

We have done numerous blasting jobs for large fabrication projects for a number of engineering companies and various concrete blasting and etching projects including asphalt removal and exposing pebble Crete driveways.

We are set up so that we are not reliant on anything. We require approximately 25sqm for enough space to blast.

Our hose can reach, working with heights ticket.....

# OUR SERVICE VEHICLE

Our service vehicle is a self-sufficient flat deck truck built with manoeuvrability and easy access in mind. Mounted on the rear flat deck is our air compressor with Blast pot and 50m of blast hose. Also stored onboard is 470 litres of water which allows this setup to blast in any area for up to 8 hours without requiring a refill depending on how the water is being used. Our blast pot is also able to be detached from the truck allowing us easier access to harder to reach places.

## SERVICE AREA

We service south east Queensland

We are based on the Sunshine Coast and operate out of Beerwah, just south of Caloundra.

We cover a large area of the South East from Hervey Bay down to the Gold Coast. We do travel outside of our standard service area depending on the size of the project.

We offer the first 50km free travel and anything after that we charge a travel fee.
